

CPD Statement

The 19th National Family Law Conference recordings are being made available on an as-is basis. The Conference itself was a CPD opportunity, but the Family Law Section makes no guarantees about the validity of these recordings as sources of CPD.

Use of these recordings to meet any professional, educational, or workplace obligations is a matter that individuals can discuss with the accrediting organisation in question – legal practitioners will need to liaise directly with their local law society or bar association.

Conference recordings are for individual use only, and further sharing, distribution, or screening is not permitted.

Western Australia

The Family Law Section will not be tracking individual views of the recordings and so cannot report them to the Legal Practice Board of Western Australia. This means that these videos are not allowable for CPD purposes for WA practitioners.
